

Hello,

My name is Phil Passilla, the President of Pennco Tool and Die and Pennco Mill Turn Fab. We are a precision machining company located in Meadville, Pennsylvania. We specialize in **custom Tooling, Fixturing, and Automation Assemblies**, tailored to fit your unique production needs. We pride ourselves on being a **One – Stop – Shop** where we can make anything from precision tooling components to full automation assemblies in house at Pennco.

Whether you're in search of a **new machining vendor** or developing a totally new system, our experienced team would partner closely with you to build solutions that increase efficiency, accuracy, and productivity. Every project we take on is guided by a deep commitment to quality and precision.

For decades, we've built our reputation on delivering innovative, reliable, and cost-effective tooling solutions that help our customers succeed. From concept to completion, we bring craftsmanship, engineering expertise, and modern technology together to produce results you can trust.

In addition to our core tooling and automation assembly capabilities, Pennco Tool & Die also offers **low-volume production runs**. This service allows our customers to test new designs, bridge the gap to full production, or meet short-term manufacturing needs without sacrificing precision or quality.

At Pennco, we don't just build tools, we build relationships. No matter the size or scope of your project, you can count on us from start to finish. Our goal is to be more than a supplier; we strive to be a trusted partner in your success. If you're looking for a company that values craftsmanship, innovation, and long-term collaboration, we invite you to discover what sets Pennco apart.

Let's build a business-to-business relationship today. Contact us to discuss your next project or learn more about how Pennco can help you achieve your production goals.

Thank you,

Phil W. Passilla
